

3-D Squared Design Services

We often receive requests to help our clients design their theaters. As simple as this sounds, it opens up a series of questions and issues that should be addressed ASAP. We created this outline to identify the design services we provide and the costs for each theater associated with these services.

Please note that on any project we may choose to partner with individuals or companies who can provide the appropriate level of expertise to your project and have them contact you directly.

- ❖ **Silver Service:** For those individuals who are basically just looking to purchase our acoustic panel décor. This includes a basic room where the panels will be the primary design element in the room. It can also be for a more complex room that has already been properly engineered and constructed but only requires our panels to complete its design concept. **Typical Theater Cost: \$1K - \$7K. Design Fee: Complimentary**
 - Includes complimentary 3-D rendering and some general design advice about the size/location/quantity of the panels, color combinations for the theater, and chair layout.

Typical "Silver" Theater

- **Gold Service:** A more complete theater that includes the acoustic panels, columns/pilasters, frames and moldings. **Typical Theater Cost: \$8K - \$15K. Design Fee: May require an additional design fee to create design/construction/engineering documents which will properly integrate all lighting, A/V and design elements of the theater.**
 - Includes complimentary 3-D rendering and some general design advice about the size/location/quantity of the panels, color combinations for the theater, and chair layout.

Typical "Gold" Theater

❖ **Platinum Service:** A high-end home theater that may contain detailed architectural elements, sophisticated lighting, Proscenium(stage, curtains, false walls), fiber-optic ceiling, custom bar area etc.

Typical Theater Cost: 16K+. Design Fee: Requires an additional design fee to create design/construction/engineering documents which will properly integrate all lighting, A/V and design elements of the theater.

➤ May require initial on-sight visit and consultation to document all the dimensions and features of the room and to facilitate a detailed discussion pertaining to the ultimate design of the theater.

Typical "Platinum" Theater
