Let us know which posters you are interested in and we can email you the poster images.

If you don't see posters on this list that you are interested in, we may be able to locate them for you. If not, you can purchase them and send to us for scanning.

High Resolution Scans

The majority of images come from high resolution scans of the original posters. Once scanned, we digitally clean up and enhance the images so they actually look better than the original poster. This results in a beautiful print that is then wrapped around a quality acoustic panel.

Precision Built With Internal Wood Frame

Our panels are made with an internal wood frame (pencil radius), which helps protect the panel and gives the panel a beautiful and sturdy edge detail.

Please note that we add a thin black border around the edge of the image. This prevents any part of the image from being wrapped over the edge of the panel.
